IT Security Awareness

Why Awareness?

Verizon, 2021 Data Breach Investigations report

CybSafe and National Cybersecurity Alliance,

OH, BEHAVE! THE ANNUAL CYBERSECURITY ATTITUDES AND BEHAVIORS REPORT 2021

SWITCH

IT Security

SWITCH

EDUCATION

Learning new skills
and the theory
behind them

AWARENESS

Raising awareness of and
interest in a special topic

TRAINING

Learning and training
(new) skills

A person wearing a dark hoodie is seen from behind, sitting at a desk with multiple computer monitors. The scene is dimly lit with a blue tint. In the background, numerous dollar signs (\$) and some 'u' characters are floating in the air, suggesting a digital or financial theme. The person appears to be working or gaming.

Security Awareness and Game Design

Gamification vs. Game Design

<https://en.wikipedia.org/wiki/Gamification>

https://en.wikipedia.org/wiki/Game_design

Advantage of Game Design in Trainings

- Have some fun
- Freedom to fail
- Satisfaction of solving the problem

Game Design in training – a balancing act

Game	Training
Game objective	Training objective
Pretending	Relevance for reality
Challenge	Frustration

Tips for game design in training

- Use existing games
- Every task/question needs to be relevant for the game
- Involve ALL players

A person wearing a black hoodie is standing in front of a light-colored, textured wall. The words "Track The Hacker" are projected onto the wall in a bright green, monospace-style font. The person's face is not visible, and they are positioned to the left of the text.

Track The Hacker

**SWITCH Security Awareness
Adventures**

Training in 3 steps

1. Learn
2. Apply
3. Recall

SWITCH Security Awareness Adventures

Hack The Hacker – the escape room

Duration:	ca. 2 h	Training topics:
Participants:	max. 6 pers.	<ul style="list-style-type: none">• Password security• Backups• Dumpster diving• Brute force methods• Social engineering• Phishing• Encryption
Target group:	employees of all fields	
https://swit.ch/hack-the-hacker		

Hack The Hacker - Objectives

Game:

- Find decryption key
- Save the organisation

Training:

The participants understand risk of poor security measures and importance of strong passwords.

SWITCH Security Awareness Adventures

Track The Hacker – the outdoor quest

Duration:	ca. 3 h	Training topics:
Participants:	max. 6 pers.	<ul style="list-style-type: none">• Data Security• Data Privacy• Social engineering
Target group:	employees of all fields	

<https://swit.ch/track-the-hacker>

Track The Hacker - Objectives

Game:

- Recover data
- Save the organisation

Training:

The participants learn how to deal consciously with personal data online.

SWITCH Security Awareness Adventures

Piece of Cake – the role playing game

Duration:	ca. 2 h	Training topics:
Participants:	max. 5 pers.	<ul style="list-style-type: none">• Social engineering• Data privacy• Data security
Target group:	employees of all fields	

<https://swit.ch/piece-of-cake>

Piece of Cake - Objectives

Game:

- Find recipe
- Save bakery

Training:

The participants learn how to detect and react to Social Engineering attacks.

- ### THE HACKER-HACKER 3X3
- #### Ransomware
1. Talk to experts
 2. Don't pay
 3. Carry out regular backups
- #### Passwords
1. Choose unique passwords
 2. Use min. 14 characters (uppercase, lowercase, special characters and numbers)
 3. Use two-factor authentication
- #### Single engine
1. Take a step
 2. Reality check
 3. Check up

Hack The Hacker – tips

Recommendations for hacker-hackers

SWITCH

Use min. 14 characters (uppercase, lowercase, special characters and numbers).
Take a step that takes you to a safe place where you can find out if you are being hacked. This might mean contacting a professional to see if you really are being hacked.

Choose two-factor authentication (2FA). Many online services offer two-factor authentication to keep your account safe. This means you need a second piece of information to log in, like a code from your phone or a security key.

What is a password? A password is a secret code that you use to log in to a system. It should be long and complex, with a mix of letters, numbers, and special characters. It should also be unique to each account.

Single engine. Don't allow yourself to be put under pressure. If you are being hacked, it's important to stay calm and think clearly. Don't panic and don't make any decisions until you have had time to think about what you are doing.

Check up. If you are being hacked, it's important to check up on your account regularly. Look for any suspicious activity and report it to the relevant authorities. Don't let anyone know that you are being hacked.

Reality check. If you are being hacked, it's important to check up on your account regularly. Look for any suspicious activity and report it to the relevant authorities. Don't let anyone know that you are being hacked.

Check up. If you are being hacked, it's important to check up on your account regularly. Look for any suspicious activity and report it to the relevant authorities. Don't let anyone know that you are being hacked.

- ### The HACKER TRACKER 3X3
- #### Social media profiles
1. Check security settings
 2. Restrict profile visibility
 3. Share data sparingly
- #### Data traces
1. Use private browsing
 2. Switch off automatic location tracking
 3. Alternative providers: Threema
- #### On the move
1. Use a VPN (virtual private network)
 2. Use a privacy screen filter
 3. Lock your screen

Track The Hacker – tips

Recommendations for hacker trackers

SWITCH

Switch off automatic location tracking. Most of your apps work even without internet to collect reports. Only switch on location tracking when you really need it.

Alternative providers. Threema, for example, is a secure messaging app that doesn't collect any data. It's a good alternative to WhatsApp or Telegram.

On the move. If you are being tracked, it's important to use a VPN (virtual private network) to hide your location. This will make it harder for anyone to track you.

Check up. If you are being tracked, it's important to check up on your account regularly. Look for any suspicious activity and report it to the relevant authorities. Don't let anyone know that you are being tracked.

Reality check. If you are being tracked, it's important to check up on your account regularly. Look for any suspicious activity and report it to the relevant authorities. Don't let anyone know that you are being tracked.

Check up. If you are being tracked, it's important to check up on your account regularly. Look for any suspicious activity and report it to the relevant authorities. Don't let anyone know that you are being tracked.

Check up. If you are being tracked, it's important to check up on your account regularly. Look for any suspicious activity and report it to the relevant authorities. Don't let anyone know that you are being tracked.

Our super amazing wonderful traditional charming classic cake recipe

Prep time: 20 min.
Bake time: 50 min.
For a 30 cm cake tin

150 g flour
180 g sugar
200 g ground almonds
100 g almonds
1 sachet vanilla sugar
3 tbsp cocoa powder
1 tsp baking powder
½ tsp salt

3 eggs
100 ml strongly brewed coffee
100 g butter, melted

Glaze
2½ tbsp strongly brewed coffee
40 g almonds, roughly chopped

A piece of cake – tips

Recommendations for social engineers

SWITCH

SWITCH Security Awareness Adventures

What we can do

- Raise (long term) interest in security
- Encourage users to deal with IT related topics
- Improve the reputation of the security department
- Improve teamwork

What we can't do

- Train a high number of employees in a cost-effective way
- Optimise it to a cost-effective training tool
- Quickly adapt to new topics

Questions?
